## About Me

I am an Information Technology (IT) student with a strong interest in web development, software engineering, and network configuration. I enjoy building websites, applications, and network-based solutions while continuing to explore advanced technologies such as AI and machine learning.

## Education

### SMK Roudlotul Mubtadiin Balekambang

Teknik Komputer dan Jaringan  
2020 – 2023

### Universitas Dian Nuswantoro

Informatics Engineering  
2023 – Present

## Skills

Web Development

Database Management

Network Configuration

Teamwork & Leadership

## Language

- English
- Bahasa

## Experience

### BLC Telkom - Klaten

2023

#### Training

- Telkom Klaten's Broadband Learning Center (BLC) is a training and competency development center for Information and Communication Technology (ICT) under Telkom's auspices. Telkom's BLC focuses on improving digital literacy through structured, tiered training programs, from basic to advanced. Through this training, I gained a deeper understanding of everything from soft skills to hard skills in the workplace.

### Bastpath-Network Academy

2023 - 2024

#### Internship & Training

- Bastpath Network is a technology and IT consulting company. The company has participated in various projects in government agencies and private companies, with services spanning the planning, implementation, and maintenance stages of network systems and IT infrastructure. Bastpath Network is known for its ability to work effectively under tight schedules and upholds professionalism and dedication in every project. During my internship and training program at Bastpath Network, I learned a lot, from networking materials, specifically on Cisco devices, to hands-on experience in the field.

### Student Organization - DOSCOM

2024- 2026

#### Universitas Dian Nuswantoro

- As a member of the DOSCOM (Dinus Open Source Community) student organization at Dian Nuswantoro University, I actively participate in developing interests and skills in the networking division. I participate in various work programs focused on improving student competency, such as sharing sessions, training, workshops, and seminars in the IT field.

## Project

### Personal Web Portfolio

An interactive portfolio website showcasing projects and professional experience.

### Yovar Laundry Web

a desktop application created to fulfill laundry services

### Cataract Detection App

An application powered by AI and Machine Learning to help identify human cataract eye images based on images.

### Company Profile Abadi ALumunium

an Abadi Aluminium company profile website starting from introduction to product catalog
